Bruny Island Battery Trial

Bruny Island Battery Trial

Installer information session

Agenda

- What are we doing and why?
- The subsidy and tech spec
- The process
- Critical things to discuss

Subsidy

- Minimum customer contribution = \$2,000
- \$3,200/kW battery capacity
- \$17,200 maximum subsidy

Supported batteries

Battery	Battery capacity	Subsidy amount
LG RESU (current version)	3.6kW	\$11,520
Tesla PowerWall	3.3kW	\$10,560
Samsung Scalable all in one 7.2kWh	4kW	\$12,800
Samsung Scalable all in one 10.8kWh	5kW	\$16,000
Magellan RES1	5kW	\$16,000

Other batteries if Reposit supports them

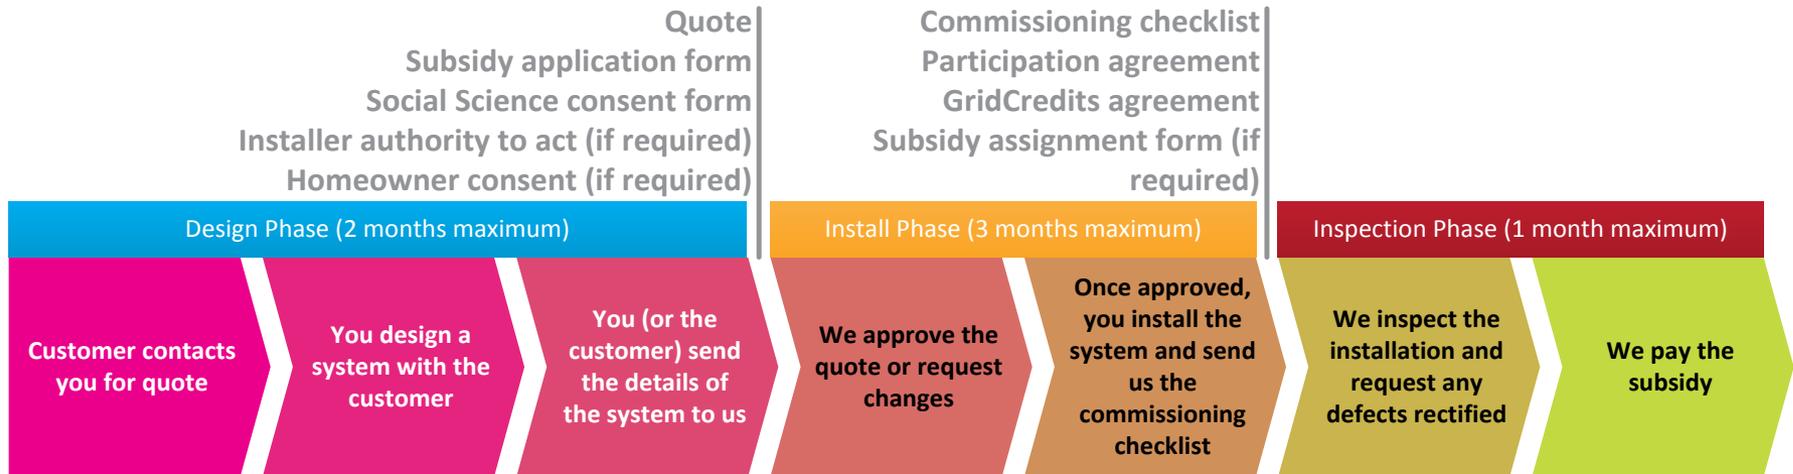

Tech spec

- Needs Battery, Solar
- Reposit compatible
- Internet connection
- Switched loads
- Monitors
- CEC battery guidelines
- Quote

Overall process

Key issue - Internet

- Need:
 - Permanent, always on
 - 1G/month data
- NBN application
- Hardware subsidy 3G dongle/antenna

Key issue - Tariff

- Grandfathered customers
- Time of use tariff

Key issue – trial participation

- Battery can't move
- Maintain battery
- Maintain internet
- Participate in research

Other issues

- Expected financial
- Home insurance
- Warranty
- Maintenance
- Disposal
- Fire
- Customer contribution
- Home ownership
